

Cheap chicken feed formulation for indigenous birds

Indigenous birds benefits

Usually, indigenous birds are preferred by many farmers since they are resistant to infections and digest. Additionally, indigenous birds can easily extract nutrients from feeds and also have the ability to scavenge feeds on their own however it is recommended to always provide supplementary feeds on a free-range system.

Feed formulation

Start by measuring 34kg whole maize, 12kg soya, 8kg silverfish, 10 kg maize brand, and 6kg lime, thereafter grind the measured ingredients separately and mix them properly. When formulating feeds produce feeds that will last for only 1 month to maintain quality. Additionally, when formulating feeds follow the correct feeding program for proper planning as well as to avoid wastage of feeds
