

Cow Farm – Cattle Farming is Profitable Business and Possible to Easily Cultivate in the Hom

Being a good investment, cattle quality and quantity production depends on the level and type of technology used.

Cattle farming is a very profitable business and to start it, it requires business plan, decision on the size of livestock project, time, number of cattle to keep per cycle, location of business and target market.

Cattle management

Start small and grow business overtime and to evaluate the potential ability of cattle for beef in relation to market price, consider the breed of cattle and the age as different breeds respond differently to beef farming process. Money to buy cattle must be always available.

Similarly housing structure must be of G.I roofing with concrete floors and troughs inside. This should be open sided and located near farmers' house. Allocate each animal with 1.5-4.5 sqm and continue by providing balanced nutritional feed for cattle fattening.

Amount of feed given depend on live weigh and age of cattle and for this, provide average of 8-15 kg of feed to each animal per day. Number of workers depend on size of cattle fattening farming project.

Finally, there is need for good technical knowledge for success of business. Supply beef to households, butcherries, schools, restaurants, companies supermarkets.
