

Fowl typhoid natural treatment remedies in chickens

Typhoid prevention measures

Always ensure to source chicks from reputable sources to avoid purchasing chicks that contracted the disease from hatcheries. Additionally, vaccinate birds timely with a good vaccine and install farm biosecurity measures. Lastly, isolate birds with typhoid signs and symptoms for proper treatment and monitoring.

Organic treatments

First, prepare thyme powder and extract, thereafter mix the powder in chicken feeds and powder in chicken feeds and water to kill the bacteria. Secondly, add 1 teaspoon of apple cider vinegar to every 3 liters of chicken drinking water to kill gut harmful bacteria. Furthermore, add 1 ml of oregano oil to every 2 liters of chicken drinking water to improve body immunity. Alternatively, prepare and add turmeric powder to chicken feeds to kill pathogen bacteria in chicken.
