Grow & Harvest The Best Pineapples in The World | David Farm

Fruit growing

First, water pineapples using sprinklers, spray using inseticides and apply fertilizers towards flower development and it should be 10:10;10 WITH 46% Mg every 2 months. Feed plants every 2 weeks when they are near harvesting and harvest pineapple fruit when its a third yellow or more and fruits harvested are taken to factory for processing which involve sorting, washing, healing, squeezing and filtration of juice, sterilisation, cooling and packing.
