How A Village Ghanaian Teacher Became A Billionaire Farmer With 40,000 Acres Of Farm Land In Kwahu

Cashew nut production

After germination in 4 weeks, remove seedlings and place new seeds in th same medium to acquire needed quantity of seedlings and plant the seedlings in field after 6 weeks and above. Prepare land well and consult technician for transplanting as it grows well in sandy loam soils which are well drained and it matures in 3 years basing on th variety and amount of waer in soi.
Similarly, when planting, make lining and pegginh well and plant coconut at 10×10 metres for best yield and finally cashew nuts dry in 2 weeks after harvesting.
