How to Get Rid of Slugs and Snails and How to Make a Codling Moth Trap

Pest management

First, mix a tea spoon of yeast, white sugar, water and put container at ground level in the garden however a farmer can also use beer to control slugs and snails. Similarly, put folded news papers in containers and put it upside down leaving smal entry for the snails and slugs to hide into them. As these hide from sunlight during day, remove and dispose them while tp prevent moths, cut 2 holes on upper either sides of plastic bottle for moths to fly into it. Mix water with molases, vineger and washing liquid to make sticky and ammonia.
Stir up the solution, put into the plastic bottles and hung them on tree. Finally, check progress of codling moth during rowing season.
