

How To Make Organic Pruning Paste & Organic Hand Cream

Paste manufacture

Put a drop of liquid onto the plate to check the level of thickness and leave it for 2-3 minutes and put the oil boiler out of the water to cool down. Separate oil from petals of rose mary after soaking in water for 2 weeks and add bee wax to the oil and make taste to make sure ream is thick enough. Similarly, remove oil boiler from water boiler and pour in glass jar and leave it to coll as well and finally place the pruning waste in containers after cooling.
