

How to start fish farming for beginners

Fish farming means

There are two major fishing means and these are, extensive aquaculture, which involves growing fish under natural water and intensive aquaculture where fish is supplied with external food sources by the farmer.

Farming guidelines

Start by constructing a good fish pond. Thereafter select good quality fish stock at juvenile stage and fill pond with chemical free water depending on the type of fish to be reared. Additionally, visit successful fish farmers before starting fish farming business to get fish farming knowledge and skills. Also feed fish on quality feeds. Furthermore provide supplementary feeds. Lastly, conduct a market survey to better understand fish market availability in your area.
