

Increasing egg production and boosting chicken weight using aloe vera powder

Powder benefits

Aloe Vera powder boosts the growth of intestinal microflora which facilitates proper feed digestion hence boosting growth and performance. It also boosts chicken immunity as well as protecting birds against coccidiosis by eliminating and killing coccidiosis parasites. Furthermore, aloe Vera powder also prevents and inhibits harmful bacteria hence preventing disease outbreaks. Lastly, it also eliminates internal parasites as well as helps administered vaccine to function properly hence boosting growth, performance and production.

Preparation steps

To prepare aloe Vera powder cut aloe Vera leaves, wash them properly and slice them into thin pieces to facilitate a faster drying process. Thereafter, dry sliced pieces properly, grind them into powder, and then serve to birds. When giving the supplement to birds add 1.5kg- 2.5kg of aloe Vera powder in 100kg of feeds.
