

Natural organic treat for all coughs & respiratory illnesses in chicken

Respiratory illness causes

Always isolate sick birds to prevent the transmission of the infection. Additionally, monitor birds properly to identify sick birds and also feed sick birds separately.

Organic treatments

Start by washing and blending turmeric and pepper, thereafter add 1 teaspoonful per 3 liters of drinking water this is effective to kill gape worms.

Alternatively, crush garlic cloves well and mix in chicken drinking water. Additionally, you can also either, add coconut oil to drinking water or administer coconut oil to severely affected to chickens through oral administration.
