»Organic Garden Spray for Vegetables and Herbs«

The application of pesticides, herbicides and weedicides on the crops improves on the quality and quantity hence high yielding ability.
When using ingredients which naturally repel insects, put garlic into blender, add other repellents such as leaves and 3 dry chilli peppers, 0.5 cup of water and blend for 2 minutes. Transfer mixture to glass jag and add water.

Organic spray

After transfer of the mixture, let the solution settle for 24 hours for extract to fuse into water and then filter and pour 0.5 into spray bottles and top up with water. Spray to the leaves/ vegetables once a week.
Finally make sure it does not rain after spraying.
